## 1/ History of the 'HR Excellence in Research' award at West Pomeranian University of Technology in Szczecin

In June 2015, the Rector of the West Pomeranian University of Technology in Szczecin (ZUT) signed a declaration of support for the principles set out in the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers. Thus, ZUT has initiated the activities aiming at implementation of the HR strategy for researchers (*HRS4R*) and receiving of the 'HR award'. This was followed by a *Gap Analysis* to assess the extent to which the functioning of the University is consistent with the Charter and the Code, which made it possible to identify areas in need of correction. The results of the analysis and identification of weaknesses at ZUT resulted in the proposal of a number of measures and the development of a Human Resources Strategy for the West Pomeranian University of Technology in Szczecin in the context of implementing the provisions of the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers. Based on the application documents submitted to the European Commission, the *HR Excellence in Research* award was granted to the West Pomeranian University of Technology in Szczecin in December 2016.

The process of implementing the *HRS4R* strategy involves a long-term commitment and involvement of the institution at each level as well as a cyclical evaluation of the progress and quality of the actions taken by the European Commission. Two years after receiving the HR label, ZUT underwent its first *Interim Assessment*, during which the European Commission's experts, on the basis of a submitted report, concluded that the effects of ZUT's work are adequate to the proposed and implemented action plan. They also appreciated the effort in documenting of the progress and commitment to implementation of the principles of the Charter and the Code. In 2022, the University will undergo another evaluation, this time within the framework of the so-called *Renewal Assessment*, the results of which will directly determine whether ZUT can continue to use the prestigious "HR Excellence in Research" distinction as a unit operating in accordance with the guidelines of the European Commission.

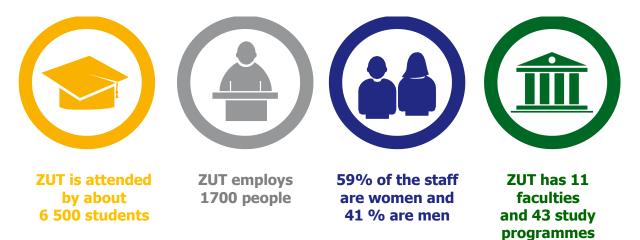

## 2/ Information about West Pomeranian University of Technology in Szczecin

The West Pomeranian University of Technology in Szczecin was founded on 1 January 2009 by merging of two former universities: the Szczecin Technical University and the Agricultural University of Szczecin.

Consolidation of research and teaching potential of the two universities was a desired and obvious step in the face of the progressing demographic decline, competition on the higher education market and expectations regarding the role of universities in developing of new technologies. In addition to broadening of the range of curricula offered by study programmes, the emergence of ZUT underpinned further, fast progress in development of new technological concepts in both technical and natural sciences. The joint research and educational heritage of the two merging universities brought a new quality to the higher education system in West Pomerania.

West Pomeranian University of Technology in Szczecin is currently attended by about 6 500 students and employs the staff exceeding 1700 people (including 286 titular professors and D.Sc. holders) out of whom 59% are women and 41% are men. The University has 11 faculties, offering 43 study programmes of the first and second cycle as well as numerous post-graduate courses.

The university has 20 rights to confer doctoral degrees and 13 full academic licences. Every year it implements a number of projects financed from external sources, distributed regionally, nationally and directly from the European Commission. In addition, each year it ranks high in the ranking of institutions actively filing intellectual property rights applications with the highest number of patents granted in the Republic of Poland (in 2019 - 121 patents, in 2020 - 85).

### 3/ The vision and mission of West Pomeranian University of Technology in Szczecin within the area of HR management

### Vision

Recruiting, developing and supporting individuals whose work contributes to an increase in the importance and prestige of the West Pomeranian University of Technology in Szczecin.

### Mission

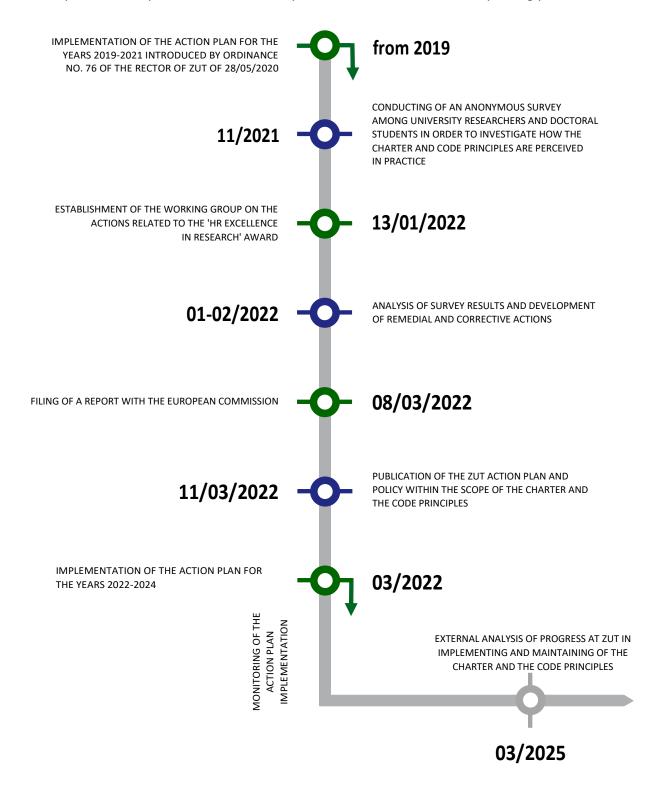

Human Resources Management of the West Pomeranian University of Technology in Szczecin is based on:

- building of the HR potential and ensuring of the University's development capacity,
- effective management and support of staff development in accordance with the needs of the University,
- creating and applying of good practices and modern solutions in the area of HR.

## 4/ The schedule for developing of an action plan within the area of the HR award

Together with the completion of positive assessment of ZUT activities within the implementation of the Action Plan as a part of the *Interim Assessment*, a decision was made to implement the provisions of the new plan scheduled for the next reporting period.

# 5/ Identification of weaknesses within the scope of the issues included in the HR award

Proper execution of the action plan connected with the implementation and maintenance of 'HR Excellence in Research' principles at the West Pomeranian University of Technology in Szczecin is supervised by the Evaluation Board. However, in order to increase the reliability and correctness of the planning of actions, a Working Group was established, composed of representatives of ZUT from various scientific and administrative backgrounds.

### **Evaluation Board members:**

- Krzysztof Pietrusewicz, PhD. Eng., Associate Professor Vice Rector for Organisation and University Development;
- Zofia Małgorzata Bednarczyk, B.A. Head of the HR Department;
- Agnieszka Korpal, M.Sc. Regional Centre for Innovation and Technology Transfer;
- Angelika Łysiak, M.Sc. Regional Centre for Innovation and Technology Transfer.

### Working Group members:

- Piotr Piela, PhD. Eng. Vice Rector for Education;
- Agata Markowska-Szczupak, PhD. Eng., D.Sc., Associate Professor Director of the Doctoral School;
- Professor Urszula Narkiewicz, PhD. Eng., D.Sc.;
- Zofia Małgorzata Bednarczyk, B.A. Head of the HR Department;
- Mariola Wachelko, M.Sc. Head of the Science Department;
- Monika Śpiewak-Szyjka, PhD. Rector's Plenipotentiary for Equal Treatment;
- Jolanta Bamberska, PhD. Trust officer;
- Marta Piątek-Hnat, PhD. Eng. Open Access Coordinator;
- Dominika Plust, PhD. Eng. Rector's Plenipotentiary for students with Disabilities
- Mateusz Lipka, M.A. press officer;
- Łukasz Marchewka, M.Sc. Chairman of the ZUT Doctoral Students Self-Government.

### Diagnosis of the state of implementation of the principles

In order to assess the status of implementation at ZUT of the principles laid down in the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers, an anonymous survey was prepared, consisting of 41 questions (in previous years, the survey was based on 31 questions). The survey was distributed to all researchers through an individual email addressed to both university teachers and PhD students. 646 people participated in the survey (including 284 women and 362 men), which is 66.80% and ensures high reliability of the results obtained. The respondents gave answers on a five-point Likert scale, ranging from total acceptance to total rejection of the statement, with the scales combined as follows to better illustrate the results: "agree" and "strongly agree" as one answer and, similarly, the statement "disagree" and "strongly disagree" as one.

### Comparison of the results of surveys conducted in the years 2018 and 2021

2018 [%]		2021 [%]
79 12 9	The ZUT gives me the possibility to choose which research I'll be doing.	90 8 3
<b>79 14</b> 7	At ZUT are generally accepted ethical practices, such as conscientiousness, trustworthiness and reliability of operations.	85 <mark>10</mark> 4
66 <mark>26</mark> 8	Research taken at the university are important to society.	75 20 5
62 <b>27</b> 11	The ZUT gives the ability to obtain all necessary permits and complete necessary formalities before starting work (including research).	70 22 8
70 24 6	The research results are stored in such a way that control can be provided.	77 20 3
78 15 7	During the research work are keep rules of safety at work.	85 <mark>11</mark> 3
<b>71 17</b> 12	During research work, I can make use of good practices and experiences of more experienced scientists.	79 <mark>15</mark> 6
<b>56 29</b> 15	I try to take all necessary actions, which can provide that research results are getting to general public.	67 26 8
<b>19 12</b> 69	I notice discrimination at ZUT, among by gender, age, origin, language, etc.	<b>12 13</b> 75
53 <mark>26</mark> 21	I think it is good that the ZUT has create staff appraisal system, which takes into account their research creativity and research results (including publications, patents, international mobility, etc.).	73 17 11
<b>56 27</b> 17	At the ZUT are clearly defined standards and procedures of recruitment for researchers.	68 22 10
<b>56 30</b> 14	Recruitment for every vacancy is carry out by objective Selection Committee.	67 24 9
<b>28 4</b> 9 23	Every candidate for the scientific position receives information about the strengths and weaknesses of her/his application.	38 51 11
<b>21 56</b> 23	At the university, achievements and professional qualifications are valued more than seniority.	58 30 12
83 <mark>12</mark> 5	At the ZUT are clearly rules to apply for a doctoral and postdoctoral degree.	90 <mark>7</mark> 3
<b>35 35</b> 30	Doctoral candidates are perceived at the ZUT as professionals.	<b>52 33</b> 15
<b>48 25</b> 27	Research Environment (laboratories, infrastructure, training) stimulate me to make decision about new research.	62 21 17
<b>79</b> 8 13	Hours of my work are flexible enough to allow me doing research.	82 8 10
<b>44 22</b> 34	Working at the ZUT gives me stabilization in my career.	69 <mark>17</mark> 14
40 40 20	At the ZUT is a gender balance, i.e. In each unit and at every level of career is more or less equally between women and men.	55 <u>30</u> 16

2021

[%]

The above comparison of the results of the 2018 and 2021 surveys clearly indicates that ZUT's efforts to implement the European HR strategy (*Human Resources Strategy for Researchers*), *the determinants for which are* the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers, are effective. The vast majority of answers given by respondents show that conditions at ZUT have improved and, in selected aspects, even significantly. However, in order to get a better picture of the situation at the University, a decision was made to ask 10 additional questions on aspects such as gender equality, intellectual property rights, discrimination or issues related to the COVID-19 pandemic. Two open questions were also used in the survey, one concerning possible observed manifestations of discrimination and the other concerning the improvement of working and employment conditions, which provided a complementary picture of ZUT.

Detailed analysis of the survey results during meetings of the Evaluation Board and the Working Group made it possible to identify areas of the University's functioning that require improvement and served to create an action plan for the next 3 years.

From the responses received, it appears that, although there has been an improvement in the assessment of the University as regards the implementation of the principles of the Charter and the Code, it is reasonable e.g. to continue to support the career development of researchers, with particular attention to the needs of young researchers; to continue efforts to implement the OTM-R policy and open access; to improve science communication. In addition, gender equality and discrimination are very important issues that the answers to the open questions highlighted. A key activity of the university is the pursuit of equal opportunities so a number of the proposed tasks relate directly to these aspects. One of them is monitoring of the progress of implementation of the Gender Equality Plan at ZUT, which was officially introduced by the ordinance of the Rector of ZUT on 10 February 2022.

## 6/ Action Plan of West Pomeranian University of Technology in Szczecin in the area of *HR Excellence in Research* award for years 2022-2024

No	ACTION	DECSRIPTION, GOALS, INDICATORS	OPERATING UNIT	DATE OF	
NO	ACTION	DECSRIPTION, GOALS, INDICATORS	RESPONSIBLE UNIT	IMPLEMENTATION	
1.	Supporting researchers in applying for external funding for research and study visits abroad	Supporting researchers in their efforts to obtain funding for research and to promote international mobility. Action implemented through trainings and individual consultations in this area.	Project Departments (ODP, NDP, RCIiTT)/ International Mobility Office	Continuous action	
		Indicators: number of applications submitted, number of training courses and participants.	Research Department		
2.	staff to familiarise them	Informing about new procedures and reminding about the existing ones as well as discussing of the issues related to them.	HR Department	Continuous action	
	with ZUT procedures	Indicator: number of meetings (min. 2 per year)	HR Department		
3.	Creation of a database for young scientists (doctoral students) containing the following offers:	A tab on the Doctoral School website including information on funding sources/job offers/scholarships/short-term mobility.	Project Departments (ODP, NDP, RCIiTT) / International Mobility Office / Department of Research		
	- R&D funding programmes, - scholarships, - short-term mobility, - jobs	Indicator: number of offers	Doctoral School	Continuous action	
4.	Training sessions for heads of organizational units within the scope of recruitment and HR management	The aim of the training sessions is detailed familiarization of the heads of organizational units involved in the recruitment process for their teams with the principles of the Charter and the Code as well as the O-TMR policy.
