

Folia Pomeranae Universitatis Technologiae Stetinensis
Agricultura, Alimentaria, Piscaria et Zootechnica

***is journal that publishes original research and review articles relating to
Agriculture and Environment, both scientific and practice area***

Manuscript structure (original articles)

Title page: The first page should indicate the title, the authors' names in full and affiliations, and a postal and e-mail address for the corresponding author.

Abstract: Each manuscript should begin with a single-paragraph abstract of max. 150 words. The abstract should summarise all aspects of the manuscript (problem(s) addressed, objective(s), methodologies, important result(s), and conclusion(s)).

Key words: For indexing purposes, a list of 6–8 key words is essential. Key words should correspond to important nouns used in the title and the abstract

Introduction: A short introduction should start the substantive text. The introduction must place the work described in an appropriate context, including results of a literature study. The introduction must clearly state the specific objectives of the work presented.

Materials and methods: This section should describe and reference the techniques utilised in the investigation and make clear the protocol of the study. The model and sensitivity of monitoring equipment should be stated in this section. Statistical methods should be described also.

Results and discussion: This section should describe what was found out and provide appropriate numerical and statistical support. The discussion should explore the implications of the findings but not be highly speculative. It may be convenient to organise the text under sub-headings (not to be numbered).

Conclusion: This section should tie the major findings to the objective(s) stated in the introduction and suggest the practical or theoretical relevance of the manuscript to future research, practices, or regulations and policies.

Acknowledgements: Please acknowledge contributors and sponsors to your work.

Manuscript style and format

File types

The Manuscript should be written as editable/source files only e.g. Microsoft Word (.doc) or .rtf. Manuscripts should be in UK English as in the Oxford Dictionary and be single line spaced. Tables, figures, and captions/legends should appear at the end of the document and not embedded in the text.

Text preparation

The text should be single-spaced throughout and with a 2.5 cm for left and right hand margins. Text should be standard 12 points Times New Roman. Please use only Latin alphabet. Latin names should be written in italic. Please do not use other types of format possibilities.

Illustrations and tables

Original line drawings and photographs must be twice the desired size (maximum printed width 130 mm) at a resolution of at least 300 dpi. Remember that text and symbols should be legible in print. Colour printing will be at authors' expense. All illustrations should be in .jpg format.

All figures must be numbered consecutively with descriptive captions and legends provided on separate pages. Each figure must be clearly referenced in the text (e.g. Fig. 4).

Authors are responsible for obtaining permission from copyright holders for reproducing any illustrations, tables, figures or lengthy quotations previously published elsewhere.

Units, abbreviations, symbols and equations

Only metric units (SI) should be used in a manuscript. After the first appearance of a term in full, a standard abbreviation may be used. Superscripts, not slashes (/), should be used to describe units, e.g. $\mu\text{mol}\cdot\text{m}^{-2}\cdot\text{s}^{-1}$.

Equations: Equations should be numbered consecutively and referenced in the text (e.g. Eq. 1), for example

$$A_m = B + C \quad (1)$$

Please use equations editors eg. Microsoft® EE.

Footnotes

Authors should not use footnotes.

References

References should be listed in alphabetical order and appear at the end of the manuscript. Citations in the text should be denoted with the author's surname and the year of publication (e.g.: using the data obtained by Kowalski et al. (2000) or using data from literature (Kowalski 1996; Pokrajac and Kowalski 2000).

If the text contains two or more papers written by the same author(s) in the same year, the citations should be differentiated by a letter (e.g.: (Kowalski 1996 a). Journal names should be given in full and should not be translated.

Titles of papers should be given in their original language (please use only Latin alphabet letters) and, if possible, they should be followed by a translation into English in parentheses.

Book example

Kowalski N.S. 1998. Water Management. McGraw-Hill, New York, USA. **Conference**

Proceedings example

Kowalski D., Jones K. 2000. Oil infiltration in the vicinity of a shallow groundwater table [in: Groundwater 2000] P.L. Bjerg, P. Engesgaard, T.D. Krom (Eds.). Proceedings of the International Conference on Groundwater Research, 6–8 June, Copenhagen, A.A. Balkema, Rotterdam, NL, 17–18.

Scientific journal example

Kowalski P., Pnic S., Delarunka R.D. 2000. Bioavailability of heavy metals in sewage sludge amended Thai soils. Water Air Soil Pollut. 122, 163–182.

Web site reference example

Kowalski S. 2004. Toxic trespass. Our Planet, 15 (2) 24–61. From UNEP, publications (2004): <http://www.ourplanet.com/imgversn/152/patton.html> (July 18, 2007).

Submitting of manuscript

Before submitting your manuscript, please ensure you carefully read and adhere to all the guidelines and instructions to authors provided above. Manuscripts not conforming to these guidelines may be returned.

Online submission and review for all types of manuscripts is mandatory. Please send manuscript at the following email address:

robert.maciorowski@zut.edu.pl

After submission, you will receive a confirmation e-mail.

Publication fees

For accepted papers, a publication fee is 250 PLN per article. Payment of publication fee is accepted only by bank transfer to:

Bank Zachodni WBK S.A. 3 O/Sz-n; 02 1090 1492 0000 0000 4903 0242

Description:

Publikacja artykułu w Folia Agriculturae..., Wydział Kształtowania Środowiska i Rolnictwa
